

MUHAMMED NIYAD

FULL-STACK DEVELOPER | MERN STACK

GitHub : github.com/Niyad-Labs | **Portfolio** : [My-Portfolio](#) | **Phone** : 8606079774

E-Mail : muhammedniyad720@gmail.com | **LinkedIn** : linkedin.com/in/muhammed-niyad

PROFESSIONAL SUMMARY

Detail-oriented Full-Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Experienced in architecting immersive web experiences and cross-platform solutions across web, desktop (Electron.js), and mobile (Flutter). Proven track record in developing interactive 3D environments using Three.js, secure local-network systems, and AI-integrated applications. Hands-on experience designing applications using MVC architecture, RESTful API design, and writing scalable, maintainable code. Currently seeking full-stack (MERN) developer opportunities where I can leverage my expertise in 3D graphics and full-stack architecture.

TECHNICAL SKILLS

- **Programming** : JavaScript (ES6+), Python, Dart, Java, C, C++, PHP, Bash
- **Frontend** : React.js, Redux, HTML5, CSS3, Sass, Bootstrap, EJS Templating, Three.js
- **Backend** : Node.js, Express.js, RESTful APIs, MVC Architecture, JWT Authentication, Middleware
- **Databases** : MongoDB (Mongoose), PostgreSQL, MySQL, Relational Database Design
- **Mobile/Desktop** : Flutter, Electron.js, Android (Java)
- **Tools** : Git (Version Control), GitHub, VS Code, Postman, Figma, Nodemon, dotenv, Vercel, Render

TECHNICAL PROJECTS

SHARE WITH NODE : SECURE LOCAL FILE SHARING WITH REAL-TIME STREAMING

Tech Stack: Electron.js, Node.js, Express.js, Vite, WebSockets

- Engineered a cross-platform desktop application for high-speed local network file sharing, eliminating reliance on external internet services.
- Developed a secure QR-code-based device pairing system, facilitating instant synchronization between desktop and mobile devices.
- Implemented a real-time media streaming engine, reducing video load time by ~40% and enabling instant playback without full download.
- Architected secure access control protocols using dynamic URL tokens and password-based authentication to protect user data.
- Optimized backend architecture to manage user sessions within a local network environment using Node.js.

PIXEL PACT : AI-POWERED DIGITAL ART WITH BLOCKCHAIN OWNERSHIP

Tech Stack: MERN Stack, Python, FastAPI, PyTorch, Flutter, MongoDB

- Developed an AI-powered platform for digital artwork generation, integrating PyTorch models via FastAPI for prompt-based processing.
- Engineered a multi-user collaborative workflow system for real time artist-client interaction.
- Designed complex database schemas in MongoDB to manage high-volume digital assets and user project history efficiently.
- Created a high-performance mobile interface using Flutter, ensuring a consistent user experience across iOS and Android platforms.

ACADEMIC HISTORY

BACHELOR OF COMPUTER APPLICATIONS (BCA) | 2023-2026 (Course Completed)

University of Calicut, MCAS College

HIGHER SECONDARY – COMPUTER SCIENCE | 2021-2023

Palora Higher Secondary School, Ulliyeri

CORE COMPETENCIES

Backend Development • RESTful API Design • Authentication & Authorization (JWT) • MVC Architecture • Database Design (SQL & NoSQL) • System Design • Real-Time Communication • Secure Application Development • Version Control (Git) • Debugging & Performance Optimization
